ABOUT US WORKINGS : ALL OVER INDIA

We work on various road testing machines like Geo-Tech Investigation, Pile Load Test, Bridge Load Test, Soil Testing(CBR,PL,PI), Ultrasonic Pulse velocity Test, Rebound Hammer Test, Half Cell Potential Test. The Objective of D&G Engineering & Consultancy is to introduce the latest techniques and to provide professional consultancy in multi disciplinary areas of Highway Engineering, traffic & Transportation, etc. The foundation of D&G Engineering & Consultancy success is built with talent and capability if its professional staff enhanced by experienced project Engineers with specialization in various disciplines. The staffing pattern compasses engineering, Planner, Designers, Quantity Surveyors and cost estimator, Surveyors, Economists and Project Management Planners in allied engineering fields. The Engineering tasks are supported by the quite component staff in drafting & System Analysis. A D&G Engineering & Consultancy is a up coming company having support of top Engineers of reputedly supports by experts in various disciplines of highest caliber. It works on the basis premise that "change is inevitable and before change can overtake and overwhelms, we must become the instrumentation of change. This organization is set up with the objective of applying modern analytical, quantitative techniques and system methodology of planning and decision making management. While the company will gradually expand its services in several areas, it needs to be appreciated that having each and every specified service in house, in the uncertain consultancy climate prevailing in the country would not be conducive to effective and complimentary growth of its activity. The company shall be engaging the services of Associates as and when there is an opportunity to utilize their distilled talent. The company has identified several individual and firms who can give such support at short notice and provide an authoritative and dependable control. This is not to presume that the company does not encompass and provide monitoring and direction for some of these functions itself but then it is also the intention not to enlarge infrastructure and direction for some of these functions its self but then it is also the intention not to enlarge infrastructure to month level and become vulnerable in the context of current uncertain consultancy profession in India. To give a fair idea of our present strength, our Executive and Associates have been responsible for several activities and are continue to remain and expand with the increasing opportunities coming in favor of the company. The strength and experience of our executive and associate is basically experience and strength. A D&G Engineering & Consultancy are professionals whose contribution during their career whether in government or in Private Sectors has been unique and of high excellence. They are in position to provide our esteemed clients the best talent and vintage experience in their respective disciplines. Their experience in Engineering works is expected to greatly increase the operational scope of D&G Engineering & Consultancy activities to client's satisfaction.
